Hi Greg this looks very robust so I can give approval subject to confirmation from the group. By the way there are a number of typos included pre-emptive is written as preemptive and other variations throughout and under sample there is a typo of therefore.

Hope that helps.

Many thanks Heather

Hi Heather,

Many thanks. I have arranged for my proposal to be considered at the next Clinical Effectiveness and Audit Group on 5 February.

I have a problem however. My proposal has to be submitted to the University (London South Bank University) school ethics committee on Wednesday 24 January, and I need to provide them with evidence that it has received appropriate approval from the Trust. Please would you be able to look over my proposal (attached) and tell me whether it is likely to get approved at the Clinical Effectiveness and Audit Group? I would then be able to tell the University ethics committee that it is likely to get approval and that I am awaiting formal confirmation of this. I would be very grateful if this would be possible.

Thank you,
Greg.
